**OCCIDENTAL SPORTS
SECURING FOOT HOLD
IN LAND OF NIPPON**

GOLF, TENNIS AND MOTORING
HAVE MANY ENTHUSIASTIC
FOLLOWERS IN JAPAN

CLUBS BEING ORGANIZED

NEW YORK, Jan. 12.—Americans interested in sport, returning from Japan, report that the Japanese are rapidly assimilating Occidental sports in general, just as they did baseball following its introduction into the land of Nippon. Golf, tennis, and motoring are all gaining devotees by the hundreds and some of the Japanese players are showing a proficiency on the court and links that promises to make them formidable opponents in the course of a few years.

In a recent discussion about sport in general, and golf in particular, a prominent Japanese, who was graduated from the University of Pennsylvania, not so many years ago, said:

"You know, we really have no game, perhaps excepting tennis which a man may continue his life years pile up and we know that exercise is necessary to keep fit. Golf fills the bill for us. As a nation we are fond of games. Wrestling and fencing for Semitic, both computers in the education of all Japanese gentlemen, and recent years have seen our schools taking up baseball, tennis, hockey and football with very considerable success."

George W. Guthrie, the American ambassador, who is an enthusiastic golfer, has presented the Tokyo club with a beautiful challenge cup which will probably be selected as the ultimate champion's cup always to remain the property of the club, the winner receiving a replica. In honor of the donor and the country he represents the first round will always be played off annually on the Fourth of July.

Several of the other principal cities have established golf clubs, notably Yokohama and Kaki, while in other sections organizations of a similar character are in process of formation. In the last census, also as in that for 1905, statistics were not collected for establishments having products for the census year valued at less than \$100 except that reports were taken for establishments idle during a portion of the census year, on which began operation during that year, and whose products for such reason were valued at less than \$100.

The word "establishment" as used in the census reports may mean more than one mill or plant, provided they are owned or controlled and operated by a single individual, partnership, corporation or other owner or operator, and are located in the same place.

The reports were taken for the calendar year ending December 31, 1914, whereas the system of bookkeeping permitted figures for that period to be secured, but when the fiscal year of an establishment differed from the calendar year a report was obtained for the operations of that establishment for its fiscal year falling most largely within the calendar year 1914.

The population of Cleburne at the census of 1910 was 10,284, and it is estimated that it was 12,000 on July 1, 1914.

The statistics represent the establishments located within the corporate limits of the city.

The summary shows a considerable increase at the census of 1914, as compared with that for 1905.

The capital invested, as reported for 1914, was \$143,300, a gain of \$50,000, over \$123,000 in 1905. In this connection it should be stated that the inquiry contained in the census schedule calls for the total amount of capital, both owned and borrowed, invested in the business, but excludes the value of rented property, plant, or equipment which was employed in the conduct of manufacturing enterprises. In the final bulletins and reports the rental paid for such property will be shown separately.

The cost of materials used in 1914 was \$1,310,000, as against \$1,025,000 in 1905, an increase of \$265,000. In addition to the common materials which enter into the products of the establishment for the census year there are included the cost of fuel, heat, supplies and rent of power and heat. The cost of materials, however, does not include unique materials and supplies bought either for speculation or for use during a subsequent period.

The census inquiry does not include amounts paid for miscellaneous expenses such as rent or offices, royalties, insurance, ordinary repairs, advertising, travel and other expenses, or allowance for depreciation.

The value of products in 1914 was \$1,200,000 and in 1905, \$1,157,000, the increase being \$42,000.

The value of products represents the selling value of pure oil at the plants as actually turned out by the factories during the census year and does not necessarily have any relation to the amount of sales for that year. The value under this head also includes amounts received for work done on purchases furnished by others.

The statistics show that in 1914 amounted to \$1,200,000 and in 1905 to \$1,155,000.

In 1914 the number of salaried employees was 122, as compared with 102 in 1905.

The average number of wage earners in 1914 was 188, and in 1905, 125.

TAILORING AND ALTERATIONS.

Men's clothing made in Corpus Christi by your tailors. Suits \$12.95 and up. Alterations of ladies' and men's clothing. N. N. HARRISON, merchant tailor, 1125 Mesquite Street, Phone 222. (222).
